

NABILA AMALIA SYAFUJINUR

Information Systems Student

Bekasi, West Java | 085134956459 | nabilasyfr96@gmail.com | [Linkedin](#) | [Portofolio](#)

SUMMARY

Information Systems student at President University with hands-on experience in web application development, database management, and data analytics through academic and personal projects. Skilled in developing systems using Laravel, PHP, Python, SQL, and MySQL, with experience in building dashboards, automating processes, and transforming business requirements into digital solutions. Strong understanding of system analysis, business processes, and data-driven decision making. A fast learner with excellent problem-solving, collaboration, and project management skills, eager to contribute to innovative technology projects and continuously expand technical expertise.

EDUCATION

President University – Cikarang, West Java

Sep 2024 – Present

Bachelor of Information Systems | GPA: 3.61 / 4.0

- Active in application development projects and data analysis.
- Completed several web-based projects and learned data management using Python and various digital tools.

MA Al Mawaddah

2020 – 2023

Social Sciences Department

- Active in several student organizations.

WORK EXPERIENCE

Data Analytics Intern – Codveda Technologies

2026 - 2026

- Cleaned and transformed customer churn datasets containing 4,000+ records using Python and Pandas.
- Performed Exploratory Data Analysis (EDA) and created visualizations to uncover customer behavior patterns and churn drivers.
- Built and evaluated machine learning models including Linear Regression, Logistic Regression, Decision Tree, Random Forest, and K-Means Clustering.
- Developed Tableau dashboards featuring KPI tracking, churn analysis, customer segmentation, and business performance insights.
- Delivered actionable recommendations based on analytical findings to support customer retention strategies.

Staff Admin – CV. Panji Karya Teknik

2023 - 2023

- Managed project documents: contracts, progress reports, worker attendance, and material delivery notes.
- Created and monitored daily and weekly reports regarding project progress.
- Performed data entry and tracked material orders to ensure timely logistics requirements.
- Handled administrative communications with vendors, contractors, and internal parties.

ORGANIZATIONAL EXPERIENCE

Student Council Treasurer (OSIS) – SMA

2022 - 2022

- Managed cash flow by accurately recording income and expenses.
- Prepared monthly financial reports and final activity reports for school events.
- Utilized Excel and Google Sheets for financial record-keeping, improving organization and analysis.
- Maintained financial archives and administrative documentation to support internal school audits.

INFORMATION SYSTEM PROJECT

My Medic – Medical Check Mobile App

2025

Mobile Programming | Java, Android Studio

- Developed a healthcare mobile application for early stroke detection and medical consultation.

- Implemented AI-based stroke detection (face symmetry, hand balance, head motion), symptom checker, video consultation, appointment booking, and medical records.
- Built using Java with activity-based architecture; designed interactive dashboard UI with quick-access menu.

Customer Churn Prediction2025

Data Analytics | Python, Machine Learning

- Conducted data preprocessing, EDA, and implemented classification models: Logistic Regression, Decision Tree, and Random Forest.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix: identified key churn factors.

Hotel Management System2024

OOVP Project | Java, MySQL

- Developed a desktop-based hotel booking and management system with room reservation, customer data management, check-in/check-out, and payment processing.
- Created database schema (ERD) and integrated CRUD operations for room and transaction management.

Laundry Management System2024

Web Application | PHP, MySQL

- Built a web-based laundry service management system with complete CRUD operations for customers, transactions, and service details.
- Designed relational database structure with multiple tables connected via foreign keys.

Student Digital Marketplace Platform2024

Startup Concept | Business Model Canvas, System Architecture

- Designed a digital platform concept to connect university students with campus organizations for fundraising, events, preloved items, and freelance services.
- Developed business model canvas and system architecture to support digital transformation; focused on trust via rating and review system.

SKILLS & TOOLS

Programming:	Java, PHP, Laravel, Python
Web Dev:	HTML, CSS, JavaScript
Database:	SQL, MySQL, PostgreSQL
Data Tools:	Python (Pandas, Scikit-learn), Excel, Google Sheets
Office Tools:	Microsoft Office (Word, Excel, PowerPoint), Google Workspace
Other:	Archives & documentation management, Communication & team coordination, Detail-oriented

CERTIFICATIONS & TRAINING

- Excel Fundamentals – MySkill (2024)
- Data Visualization – MySkill (2024)
- Python for Data Analysis – MySkill (2024)
- Data Analyst Bootcamp – RevoU (2024)
- Junior Web Developer – BNSP (2025)
- LLM-Based Tools & Gemini API Integration for Data Scientists – Hacktiv8 (2026)

LANGUAGES

Indonesian:	Native
English:	Intermediate
